

TYP RETROFIT

RAPID REPLACEMENT WITHOUT INTERRUPTION OF SYSTEM OPERATION

Control components for VAV terminal units as a replacement for previous types while the VAV terminal unit remains installed

- Easy alternative to replacing a complete unit
- Replacement in case of modernisation
- Extended range of functions
- Installation without interruption of system operation
- For circular ducts of nominal sizes 100 to 400 mm

Retrofit parts kit consists of:

- Control components Easy, Compact or Universal
- Differential pressure sensor
- Accessories

Application

Application

- RETROFIT parts kits for the replacement or modernisation of control components in existing VAV terminal units
- Ideal for cases where it is not possible to replace the entire VAV terminal unit
- Replacement of faulty or dirty electronic or pneumatic units
- Replacement of faulty units with airflow velocity sensors
- Conversion of a constant air to a variable air volume system
- Extension of range of functions to save energy, for more comfort, or for integration with the central BMS
- No changes to ductwork necessary since the existing unit continues to be used

Special features

- Quick replacement
- Low modernisation cost, quick return on investment
- No interruption of system operation
- Low costs of disposal
- Electronic compatibility remains unchanged

Description

Variants

- EasySet
- CompactSet
- UniversalSet

Parts and characteristics

- Kits consist of control components and accessories
- Electronic volume flow controller and actuator
- Differential pressure sensor for volume flow rate measurement
- Stickers for VAV terminal unit and for inspection or maintenance documents

Accessories

- 1: Special adapter for EasySet and CompactSet
- 2: Special adapter for UniversalSet
